Forest Solutions Ltd

🌲 Forest Operations Supervisor – Logic Forest Solutions

Location: Gisborne, Tairāwhiti

Employment type: Full-time

Salary: Competitive remuneration package

Are you a capable, practical forestry professional who enjoys being in the field, leading operations, and seeing work delivered to a high standard?

Logic Forest Solutions is seeking a Forest Operations Supervisor to support and oversee forest operations across our Gisborne region. This is a varied, hands-on role suited to someone who enjoys combining field supervision with planning, coordination, and quality control.

You'll play a key role in supervising land preparation, forest establishment, silviculture, and general forest operations — ensuring work is carried out safely, efficiently, and in an environmentally responsible manner.

🌿 About the role

Working closely with the Forest Operations Manager, you will be responsible for:

- Supervising land development, forest establishment, and silviculture operations
- Coordinating contractors and field activities to meet safety, environmental, quality, and production expectations
- Carrying out regular site inspections, quality checks, and operational supervision
- Supporting health, safety, and environmental compliance, including pre-starts, site audits, and incident follow-up
- Monitoring forest health, access, and operational conditions
- Liaising with landowners, neighbours, and stakeholders
- Contributing to work programmes, operational reporting, and job management systems

This role suits someone who enjoys responsibility, problem-solving in the field, and being actively involved in the delivery of forest operations.

About you

We are looking for someone who brings both practical forestry experience and strong personal drive. Ideally, you will have:

- Experience in a field-based forestry or operations supervision role
- A solid understanding of forest operations, health and safety, and environmental management
- The ability to supervise contractors, manage priorities, and respond to changing site conditions
- Strong communication skills and a professional, solutions-focused approach
- Confidence using office and operational systems for reporting and job management
- A positive attitude, strong work ethic, and willingness to continue developing your skills

A forestry qualification and/or health and safety training is preferred but not essential for the right person.

About Logic Forest Solutions

Based in Gisborne, Tairāwhiti, Logic Forest Solutions has been delivering forest management and operations services for over 25 years. We are a team of committed professionals who value Honesty, Legacy, Innovation, Quality, and Fun. We're proud to work in an industry that supports sustainable land use, regional development, and long-term environmental outcomes.

Why join us?

- Varied field-based role with real responsibility and autonomy
 - Supportive, experienced team who value practical thinking and teamwork
 - Training and development opportunities
 - Competitive remuneration package, including company vehicle and phone
 - Lifestyle location – rivers, forests, beaches, hunting, fishing, and surfing on your doorstep
-
